YOUR WITNESS SHOWS YOU A PICTURE OF A “UFO”

Did you know that from the beginning of the first ever sighting of a “UFO”, people around the world have been trying to fraudulently reproduce a photograph of a “UFO”? Thanks to recent technological breakthroughs most of these photographs are exposed for what they are “Fake”, and still today we find people out there continuing this venture for many different reasons. The main reason a person would take up this as a hobby usually revolves around “Self Importance” or “Notoriety” and Fortune and Glory. It becomes evident over time there may be physiological or sociological problems with the individual; however, they usually take things to the extreme for “Notoriety” and if they think they have achieved their goal, they will continue to attempt to deceive “you” the researcher.

NOTE: WHEN WE RECIEVE A REPORT, THE VAST MAJORITY OF THE TIME THE PHOTO HAS BEEN REVIEWED FOR ITS CONTENT OR AUTHENTISITY. WE HAVE AT OUR DISPOSAL PROGRAMS SUCH AS PHOTO EXPLOSION DELUXE, ADOBE PHOTOSHOP CSH EXTENDED PROFESSIONAL EDDITION, MICROSOFT PICTURE IT, PASSPORT AND OTHER PHOTOGRAPH ENHANCEMENT SOFTWARE THAT WE TYPICALLY USE. SHOULD YOU ENCOUNTER A PHOTOGRAPH DURING YOUR RESERACH AND YOU NEED ASSISTANCE TO SCRUTINIZE IT’S AUTHENTICITY, DO NOT HESITATE TO EMAIL US.

Most UFO pictures that are seen around the web are fraudulent. Today we live in a world where people who are empowered by the personal computer can easily create fake UFO photographs at will. Many UFO pictures are faked simply by knowing one’s way around a graphic art program, and the more skilled a graphic artist is, the harder it is to determine if the UFO picture is authentic or fake. With a little time on one’s hands and some patience, a person can create a compelling argument for the existence of UFOs in less than one hour.

The UFO craze created a myriad of hubcap throwers, who looked to capture just the right aerial image to show their friends. Some UFO picture creators even tossed trash can lid's, cereal bowls, and hats and their own UFO models against scenery that would make it difficult to judge the object's size. The sky afforded the best UFO picture background, as no object for size or comparison would be photographed.

Some UFO pictures were faked by painting an image (or pasting an image) onto a photograph of scenery and then re-photographing close-up the entire compilation again. The effect seemed to blend the image of the UFO into the picture nicely.

In the modern age, UFOs can be created easily as simple light anomalies within digital photos, or even crafted into glorious ships by the same photo editing or art program. If one wants to fake a UFO picture that is even more convincing, then building a realistic looking UFO model and photographing it against a green screen background works best. The UFO model can easily be cropped out of the photo and pasted onto a photo of scenery quite easily, all through a computer program.

Fake UFO photos can be easy to detect as most creators forget to account for the direction of sunlight in the background photo, in comparison to the shadows cast upon the fake UFO itself. Also look for fake UFO pictures that appear "constructed" and not a naturally created photograph. Misaligned pixels are another hint. Just imagine the shocked, amateur photographer trying to photograph an elusive UFO that is moving and possibly not trying to be seen. That would lend one to think that the UFO should commonly be blurred to some degree.

In this digital age we live in it is well to remember, as the software programs become more sophisticated and user friendly, more people will attempt to fool the researcher. You should also remember what is good for the goose is also good for the gander. Those same software photo programs can also be used to detect a fraudulently contrived UFO photograph that is meant to fool you.

PARANORMAL TIPS

Always plan your investigation in advance and research the background of the site you wish to investigate beforehand. Keep a log of equipment used at the site, as it will also come in handy to make sure you didn't overlook a piece of equipment and leave the site without it.

Remove batteries from equipment you don't use often as an old and leaking battery can destroy a valuable piece of equipment. Test and replace bad batteries monthly. Note: Rechargeable batteries are not the best for longevity in the field.

NOTABLE UFO QUOTES

"The evidence is overwhelming that Planet Earth is being visited by intelligently controlled extraterrestrial spacecraft. In other words, some UFOs are alien spacecraft. Most are not. It's clear from the opinion polls and my own experience, that indeed most people accept the notion that some UFOs are alien spacecraft. The greater the education, the more likely to accept this proposition"

-- Stanton Friedman Defense Contractor Nuclear Physicist

"The UFO phenomenon being reported is something real and not visionary or fictitious"

--General Nathan Twining Chairman, Joint Chiefs of Staff, 1955-1958

"When the long awaited solution to the UFO problem comes, I believe that it will prove to be not merely the next small step in the march of science, but a mighty and totally unexpected quantum leap." "We had a job to do, whether right or wrong, to keep the public from getting excited"

--Dr. J. Allen Hynek, Director US Air Force Project Blue Book as a Scientific Consultant, Astronomer, Investigator.

On June 24, 1947, while flying near Mt. Rainer, Arnold claimed to have seen nine unusual objects in the skies. He also claimed to have seen UFOs on several other occasions afterwards, as well.

Arnold originally described the objects' shape as "flat like a pie pan", "shaped like a pie plate", "half-moon shaped, oval in front and convex in the rear", "something like a pie plate that was cut in half with a sort of a convex triangle in the rear", or simply "saucer-like" or "like a big flat disk", and also described their erratic motion being "like a fish flipping in the sun" or a saucer skipped across water. From these, the press quickly coined the new terms "flying saucer" and "flying disc" to describe such objects, many of which were reported within days after Arnold's sighting.

Later Arnold would add that one of the objects actually resembled a crescent or flying wing (see image above). The U.S. Air Force formally listed the Arnold case as a mirage; this is one of many explanations that have been disputed by critics, and researchers. There has never been an entirely persuasive conventional explanation of the Arnold sighting.

HAS THE OBJECT IN THE BALTIC SEA BEEN IDENTIFIED?

May actually be top-secret Nazi anti-submarine trap lost since WWII

([London Daily Mail](#)) Divers exploring a 'UFO-shaped' object in the Baltic Sea say that the strange, curved object might be

a Nazi device lost beneath the waves since the end of the Second World War.

Sonar scans have shown that the device, raised 10ft above the seabed and measuring 200ft by 25ft, could be the base of an anti-submarine weapon.

The weapon was built with wire mesh, which could have baffled submarine radar, leading enemy craft to crash – much in the same way as turning out a lighthouse beacon could be used as a weapon against shipping.

But now former Swedish naval officer and WWII expert Anders Autellus has revealed that the structure could be the base of a device designed to block British and Russian submarines.
