

# UFORCOP NEWSLETTER

## May 2012

### Welcome To UFORCOP'S Monthly Newsletter

You can file a report or obtain information by going to our [Contact Us](#) page and filling out the form and hit the submit button. **A researcher will contact you within 24 hours.**

Anyone wishing to have a presentation given to a group can use the [Contact Us](#) page on the website.

**ANNOUNCEMENT:** In this and future newsletters we will include Investigator Tips and Equipment usage in the field.

**Book of the Month:** The Hunt For Zero Point, by Nick Cook available at [www.amazon.com](http://www.amazon.com)

**SITE OF THE MONTH:** UFO Casebook,  
[www.ufocasebook.com](http://www.ufocasebook.com)

# UFORCOP NEWS

We investigate cases in Pennsylvania and other states and countries. If you have a present or historical case you would like researched contact, [butch@paufosearch.com](mailto:butch@paufosearch.com)

We **do not** comment on other group's investigative results. If you have an issue with those results contact the investigator or group you dealt with. Thank You.

Due to the increase in traffic on our website which has averaged 2000 hits per day for the last 30 days, we have increased our bandwidth considerably which should handle any issues.

**Information needed for any sightings in Florida between 1975 and 1977 of an Orange colored square in the sky.**

## Report a UFO Sighting

To speak with one of our researchers, please send us a confidential email and include the following information.

- Your name
- Contact phone number or email address
- Date and time of event
- Location (city / county / state)
- Brief description of your sighting
- How many witnesses were involved?
- How close were you to the object?

Attach any Photos, Drawings or EVP recordings.

Email us at [butch@paufosearch.com](mailto:butch@paufosearch.com)

**UFORCOP MOBILE UNITS** based in Eastern and Western Pennsylvania allow us to cover any report within a matter of a few hours. The equipment on board is constantly being updated and improved.

2012 Ford Econoline Extended Body Panel truck arrived April 14, 2012. It replaces unit #2. The unit gives us more space and will haul more load than the 2012 Ford Transit we were planning on. It offers us more security for the contents with a state of the art alarm system, built in shelving and bulkhead as well as trailer towing capabilities.

A few pieces of equipment need to be added yet, but as of April 21, 2012, the unit is ready to roll.

**INTERVIEWS MAY 2012**

**INCEPTION RADIO NETWORK**  
**Project White Paper**

**May 2, 2012**  
**9 PM EST**

## UFO RESEARCH CENTER OF PENNSYLVANIA SIGHTINGS MAP, APRIL 2012

### SIGHTING ACTIVITY 22 REPORTS from 17 COUNTIES

ALLEGHENY, WESTMORELAND, FAYETTE, SOMERSET,  
DAUPHIN, LEBANON, PIKE, BUCKS, BERKS,  
LANCASTER, YORK, MIFFLIN, CENTRE, SNYDER,  
MONTOUR, CLINTON, SCHUYKILL

**UFORCOP** Is looking for any reports of mysterious lights or sightings of UFOs around **Nuclear Power Facilities**.

## **PARANORMAL**

**UFORCOP** will be going to **Gettysburg** in the autumn of 2012 to do a paranormal investigation of strange things sighted at that location.

## **CRYPTO ZOOLOGY**

Anyone with information on sightings in the Pennsylvania area of (Panthers, Mountain Lions, Cougars, Thunderbirds etc.) Please email [madhunterpa@gmail.com](mailto:madhunterpa@gmail.com) or [apehunterpa@gmail.com](mailto:apehunterpa@gmail.com) or [hellhunterpa@gmail.com](mailto:hellhunterpa@gmail.com)

## **MOST REPORTED CREATURES IN PENNSYLVANIA**

Cougar, Coyote, Wolf

## **LEAST REPORTED CREATURES IN PENNSYLVANIA**

Bigfoot, Thunderbirds

## **ANIMAL MUTILATIONS**

There have been **no reports** of Cattle Mutilations in Pennsylvania that can be located and verified.

## **UFORCOP NOTE**

**We do not accept donations of any type. We are self-funded. We do not charge a fee for Research or Investigations.**

## **INVESTIGATION TIPS**

THE TRIFIELD METER

### **HOW DOES IT WORK AND CAN IT HELP YOU?**

This by no means is meant to be an advertisement for any particular product however, it is meant to show that the advancement in the industry has finally combined three meters into one, the MAGNETIC FIELD DETECTION, ELECTRIC FIELD DETECTION AND RADIO AND

**MICROWAVE DETECTION.** How convenient can that be when out in the field investigating sighting a report. Instead of trying to carry three different meters, you only need to carry one and the entire non-ionizing electromagnetic spectrum is covered.

### **MAGNETIC FIELD DETECTION:**

In most homes or offices, some areas are "hot" spots with readings in the HIGH range. Most of the magnetic fields come largely from unpaired internal wiring. Contrary to popular belief, power receptacles do not generally contribute as much magnetic field as does internal wiring. Other magnetic sources such as motorized clocks and other equipment, electric blankets and heaters, fluorescent lights and lights that are built into consumer devices. Much of the total field strength is from frequencies that are from (120 Hz, 180 Hz, etc) and 17,000 Hz of video displays. Cars (especially near the front floor board) and motorcycles have fairly strong fields that are at frequencies higher than 60 Hz. If you happen to be outside and begin to achieve readings of above 1-3 milli-gauss, the investigator needs to pay particular attention to the surroundings. Above 1-3 milli-gauss within the area of the Northern Hemisphere is considered a High reading.

### **ELECTRONIC FIELD DETECTION:**

When taking readings within a home a few areas may read High. These areas include but are not necessarily limited to, near or in front of video screens and/or fluorescent lights. Most of these fields can be easily shielded with the use of aluminum foil. You can greatly reduce the strength of an electronic field by placing your hand between the meter and the source. Outside the home in the field where you will be conducting your investigation, should you obtain a reading that appears to be High on the meter, it is advisable to begin

the search the area for the source of the High meter strength, while constantly moving toward the area of the higher reading.

**NOTE:** AN EXTERNAL MAGNETIC FIELD OF 3 MILLIGAUSS OR AN ELECTRIC FIELD OF 2.5 KILOVOLTS WILL PRODUCE APPROXIMATELY ONE BILLIONTH AMP PER SQUARE CENTIMETER. THE CURRENT PRODUCED INSIDE THE BODY HIGHER THAN ONE BILLIONTH AMP PER SQUARE CENTIMETER, AT FREQUENCIES OF 1000 Hz OR BELOW. NO ABSOLUTE HAZARD THRESHOLD HAS BEEN ESTABLISHED YET, BUT THE LOWER LIMIT FOR BIOLOGICAL EFFECTS IS PROBABLY A FACTOR OF THREE FROM THAT LEVEL. PRELIMINARY RESULTS SUGGEST ALSO THAT IT IS BETTER TO SPEND A SHORT TIME WELL ABOVE THIS THRESHOLD THAN A LONG TIME JUST ABOVE IT. AT FREQUENCIES ABOVE 1000 Hz THE BODY IS LIKELY TO BE SENSITIVE, BUT NOT AS SENSITIVE AS IT IS TO LOWER-FREQUENCY CURRENT.

AN EXTERNAL MAGNETIC FIELD OF 3 MILLIGAUSS OR AN ELECTRIC FIELD OF 2.5 KILOVOLTS WILL PRODUCE APPROXIMATELY ONE BILLIONTH AMP PER SQUARE CENTIMETER. THE CURRENT PRODUCED INSIDE THE BODY IS PROPORTIONAL TO FIELD STRENGTH TIMES FREQUENCY. SO ACTUALLY ONLY HALF THE AMOUNT OF FREQUENCY IS REQUIRED TO PRODUCE THE SAME CURRENT INSIDE THE BODY. INTERESTINGLY, A FAIRLY STRONG MAGNETIC FIELD (500 MILLIGAUSS) AND AN ELECTRIC FIELD (ABOUT 2 KILOVOLTS) ALREADY EXIST IN NATURE, BUT THESE FIELDS ARE STATIC AND THUS HAVE A FREQUENCY OF ZERO. MEANING THEY PRODUCE NO CURRENT INSIDE THE BODY.

**MICROWAVE DETECTION:**

Radio and microwaves are composed of a particular combination of electric fields and magnetic fields that is self-sustaining. For frequencies below approximately 100 MHz the principle effect on the human body is low. Occasionally, certain areas inside a home may read High in the radio/microwave setting. These include door seals around microwave ovens and cellular phones. Radio/microwaves can be shielded in the same way as electric fields, although the lower frequency radio waves are not shielded by your hands as easily as microwaves are. In the U.S., radars and FM transmitters can legally expose residents to moderately high power levels (as high as 10 mw briefly), but such exposure is not common. In the field, should you encounter a high reading, be careful as to the strength and proximity to any known towers or buildings. High readings can produce instability within the body even if it is over a short period of time. Wearers of pacemakers should avoid even brief exposure to high radio/microwave powers levels. Remember, some evidence suggests that even brief exposure to high AC electric, magnetic or radio/microwave fields may cause nervousness or seizures in some people.

**HOW IS THE METER UTILIZED IN THE FIELD OF UFOLOGY?**

UFO sightings are often accompanied by disturbances in electrometric and/or radio/microwave fields. A change in the Natural Magnetic field is the most frequent type of disturbance found with incidents involving UFOs.

Unfortunately, people and many commonplace things such as the atmosphere on a windy or cloudy day emit variable electric fields, so this type of field can be used as a reliable detection scheme. Sometimes electromagnetic, radio and microwave detectors are thought of as a reasonable indicator of UFO activity in close proximity. However, care

should be taken to avoid false alarms in urban areas. Gauss meters are sometimes used for UFO detection, but they usually detect only the magnetic field from nearby household current, all of which causes false alarms.

So the bottom line appears is, as always, know the projected capabilities of your equipment before making any claim of UFO activity in the nearby vicinity. It may turn out to be a false alarm.

### Paranormal Tips

Remember places that are listed as haunted most often require permission to visit or investigate. The authorities patrol most of these locations and trespassers will be prosecuted or at the very least escorted out of the area.

## New UFORCOP Patch

## VISITOR OR CAMERA GLITCH?

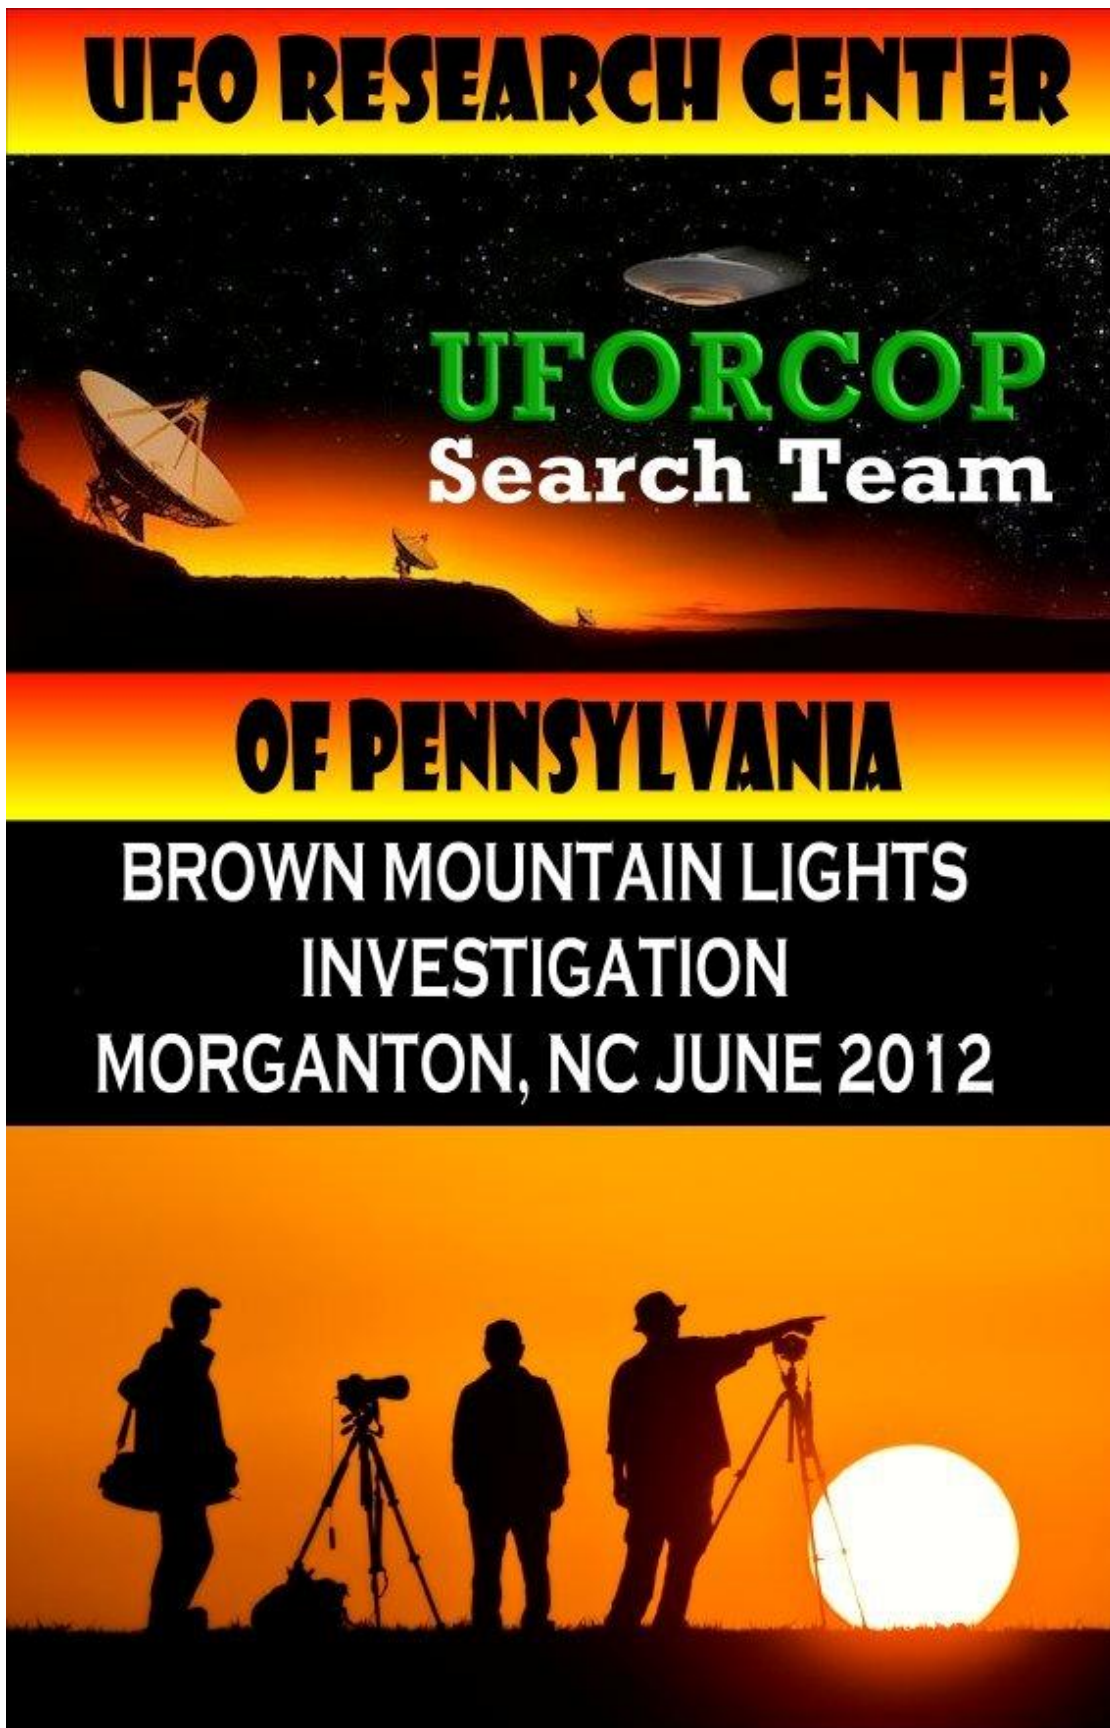

Scientists from the solar physics branch at the United States Naval Research Laboratory (NRL) — the group that analyzes data from Lasco 2, the telescopic camera that snapped the picture said according to Nathan Rich, lead ground systems engineer in the NRL's solar physics branch, the "spaceship" is merely a collection of streaks left by cosmic rays, charged particles from space, which whizzed through the camera's sensor, or CCD, as the image was taken.

## Notable UFO Quotes

- "The evidence is overwhelming that Planet Earth is being visited by intelligently controlled extraterrestrial spacecraft. In other words, some UFOs are alien spacecraft. Most are not. It's clear from the opinion polls and my own experience, that indeed most people accept the notion that some UFOs are alien spacecraft. The greater the education, the more likely to accept this proposition"  
-- Stanton Friedman Defense Contractor Nuclear Physicist
- "The UFO phenomenon being reported is something real and not visionary or fictitious"  
--General Nathan Twining Chairman, Joint chiefs of Staff, 1955-1958
- "When the long awaited solution to the UFO problem comes, I believe that it will prove to be not merely the next small step in the march of science, but a mighty and totally unexpected quantum leap." "We had a job to do, whether right or wrong, to keep the public from getting excited"  
--Dr. J. Allen Hynek, Director US Air Force Project Blue Book as a Scientific Consultant, Astronomer, Investigator.
